Material Grade

- Bemenn Custom Wood Products offers multiple grades of material in order to get the most of our natural resources.

Premium	Selected for superb color and grain match. Intended for clear finish or light stain. On heart woods ie: cherry - no sapwood will appear on face of the door. On sap woods ie: maple - no heartwood will appear on the face of the door.
Custom	Good grain and color matching. Intended for medium color stains. On the heart woods ie: cherry - sap may appear on face side of the door, in machined profiled areas ie: panel raise, door lip etc. Mineral and small pitch marks may appear on door face. On sap wood ie: maple - heartwood and some mineral streaks may appear on the face side of the door, in machined profile areas ie: panel raise, door lip etc.
Mill	Good grain match - no color match. Material is matched light-to-light and dark to dark as much as possible. Intended for dark stain and /or distressed and antique style finishes.
Paint Grade	No grain match. No color match. Intended for solid color applications.
Rustic/ Knotty	This grade is available in such species as Cherry, Alder and Red & White Oak.

Flat Panel Doors

- Certain wood species are available in a flat panel design.
- Flat panel doors can be ordered in all grades.
- Special note: veneer products are produced from the best possible natural resources. Thus, the quality and appearance of some veneers will not match up with solid stock. Bemenn will do everything possible to maintain a constant look between veneer products and solid wood. But will not guarantee that they will match, as naturally as solid panels and framing match. When considering design options please keep this fact in mind.
